

Applauding the 2016 American Nurses Foundation Scholars

The American Nurses Foundation is grateful for the generosity of supporters over the last 61 years who have made it possible to award more than \$5 million to more than 1,100 beginning and experienced nurse researchers.

In 2016, the Foundation awarded over \$252,500 to support nursing research, including a new focus on research at Magnet and non-Magnet facilities with support from the American Nurses Credentialing Center.

We proudly welcome the following scholars to our flagship Nursing Research Grants program.
